

High School Rankings Based on Index Scores

from May 2009 NH-Alt and May 2009 NECAP Science Statewide Assessments

Content: Science
Sorted by: Name

The data provided in these rankings are calculated based on the same performance index method that is used to rank schools and districts in reading, writing, and mathematics. Schools and districts receive a rank based on their index score. A rank of "1" represents the best performance. When a previous index score is available, a separate ranking is also calculated based on the improvement in the index score from one year to the next year. Schools or districts that have the same index score (or the same improvement in index score) earn the same rank. The schools and districts are sorted three ways: alphabetically, by index score ranking, and by improvement ranking.

‡ There is some variation associated with all measurement, including test scores. For example, the results of public opinion polls are reported with a margin of error, such as 54 percent plus or minus (+/-) five percent. On these ranking lists the reported variation is the standard error of the mean (SE). Please note that as the number of students increases, the SE decreases.

High School Rankings Based on Index Scores

Sorted by: Index Score Ranking

The data provided in these rankings are calculated based on the same performance index method that is used to rank schools and districts in reading, writing, and mathematics. Schools and districts receive a rank based on their index score. A rank of "1" represents the best performance. When a previous index score is available, a separate ranking is also calculated based on the improvement in the index score from one year to the next year. Schools or districts that have the same index score (or the same improvement in index score) earn the same rank. The schools and districts are sorted three ways: alphabetically, by index score ranking, and by improvement ranking.

Sorted by: Index Score Improvement Ranking

The data provided in these rankings are calculated based on the same performance index method that is used to rank schools and districts in reading, writing, and mathematics. Schools and districts receive a rank based on their index score. A rank of "1" represents the best performance. When a previous index score is available, a separate ranking is also calculated based on the improvement in the index score from one year to the next year. Schools or districts that have the same index score (or the same improvement in index score) earn the same rank. The schools and districts are sorted three ways: alphabetically, by index score ranking, and by improvement ranking.
